

Job Posting Description

Senior Forensic Examiner

B&V Pathway Forensics DBA Pathway Forensics is a computer forensics and electronic discovery service provider. Pathway Forensics' team of experts has extensive experience in digital forensics acquisition and analysis as well as large-scale enterprise collection and processing for electronic discovery matters. Our firm offers practical, cost-effective solutions as well as the latest services and technology in the industry. Typical cases handled by the firm involve business and employment disputes, compliance and discovery requests in litigation and government investigations, and fraud and criminal investigations for clients including Fortune 500 corporations, law firms and private companies.

Responsibilities:

- Follow Pathway Forensics processes and procedures on cyber forensic investigation
- Contribute to a strong client relationship through interactions with client personnel
- Work on multiple ongoing projects
- Provide project status reports
- Conduct forensic analysis on evidence and report findings
- Assist in other related areas of the company as needed or required
- Available to work overtime daily on short notice and/or on weekends as necessary
- Complete annual training and certification as required

Qualifications/Experience:

- Candidates must have a Minimum of 2-3 years' experience conducting digital forensic examinations
- Possess at least one forensic certification
- Demonstrated abilities using Microsoft Access, SQL or other RDBMS
- Strong technical knowledge of Windows operating systems
- Effective communicator (both written and oral)
- Professional demeanor, motivated self-starter
- Strong analytical and problem solving skills
- Ability to interface directly with clients
- Clean background check
- Team player, works well with others

Education:

- High School Degree a must

Preferred:

- EnCase Certified Examiner (EnCE)
- College degree or additional technical certifications
- Testimony experience
